To Whom It May Concern,

Re: Living Landscapes – Micha Mahler

I have had the privilege of knowing Micha for many years and have seen many of the developments he has been involved in creating and beautifying with his landscaping skills.

Personally I have sought his advice, used his expertise and engaged his services for a number of projects over many years, both commercial and rural residential, some of significant scope. I and my wife have always been pleased with his ideas, his ability to come up with solutions within specified budgets, and to complete work in an efficient manner to a high level of workmanship. He has consistently delivered pleasing results that are all the more delightful to live with as a finished environment than the anticipation from planning stages lead us to imagine.

I appreciate too his honesty and integrity in his work and his interest in not just finishing the job well but in seeing that the ongoing development as plants grow progresses as planned.

I have no hesitation in recommending him to all who are interested in getting a pleasing quality landscape job and in gaining a friend.

Yours sincerely,

Uwe Balzat
Director
